I do not recommend this game. Even if you buy it on sale, it's not worth the price.

Pros-

1. The art is the only thing I liked about this game. The environments are pretty well drawn and are what initially enticed me to buy the game. Even so, there's places where the characters are drawn in awkward-looking positions and for me, it breaks the immersion.

Cons-

1. The price. This game is 7 dollars US. It's not worth even three dollars as an experience. Here's why:

2. The dialogue is stilted and deadpan. I'm not sure if it's due to the inexperience of the actors or the translation of the script, but no one in this game seems to completely sell their emotions in any scene. Christina's character is the only one which comes even close.

3. There is pixel-hunting in this game.

4. The solution to any and every puzzle is finicky. Some actions are obvious, like cutting the straps to the barrels, but we're not permitted to do so until the game tells us to do it. There are other instances in which this happens, where we need to prompt a spoken piece of dialogue. It basically becomes an exercise in trying every item on every interaction before moving on. If they're not obvious and blocked off, then they make little sense.

5. One more problem with puzzles, there is a puzzle near at the end which necessitates the use of an object mentioned in the first ten minutes. It looks identical to everything else in the room and if I had not specifically made note of it, I would have been stuck on this dumb solution.

6. The story in general. Oliver's problems are predictable and handled badly. His need to call his wife, during a robbery and then an assault, is just ridiculous. He even says he could call his business associate/crime buddy to stop this problem. His actions with the cashier are cringe-worthy. The phone call in the beginning implies Oliver is a criminal, we don't need him to tell us he is, and apart from some behavioral problems, he never comes across to the audience as the lost cause the game wants him to be. The plot here is too irrational to be taken seriously. Why have the sexual assault plot point at all when it affects nothing? It's tasteless and it was not presented in a respectful way. Overall, the story just tells us that... crime and alcoholism is bad? Oliver never gets help for his addictive problems and Oliver's covering up the murder is presented as just for his guilt and actions. The plot overall, is just a mess.

7. The dream sequence lags constantly and has no reason to do so.

8. The audio mixing sometimes covers over spoken dialogue, even on default settings.

9. There is no flavor text on items in your inventory, if you ever needed to get up from this game and forgot what all of them were, you would not be able to determine what some of them actually are.

10. Lastly, length. I spent 2 hours with this game. If I had not had to fight the walking speed and the event triggering-dialogue, I would have completed this game in one.

If you value your time, don't buy this game. It is too serious and poorly handled for it to be anything other than a money sink..

"Perhaps it is time to be aware, perhaps it is time to wake up."

Only If is a puzzle/exploration game as a collection of quite unconventional happenstances. Even after fully completing the game, I keep contemplating over it. Then, the developer must have achieved what he was striking for: through a series of "fourth wall breaking" scenes and situations, this game made me think on a deeper meaning hidden behind the absurd. As mentioned by the creator: "finding worth in the worthless".

Only If starts with Anthony going to Sam's party - a girl that he's into as we know. The screen starts to get blurry with music fading on the background. The next thing we know, is that we wake up after a party hard and no one seems to be around. We wander within the mansion and stumble on Vincent, or rather Vinny - who prefers to communicate with us through old radios for some reason. He mocks, insults, and challenges Anthony at every step of his journey, for either finding Sam or getting the hell out of this damned mansion by himself. What will you choose?

The game holds and utilizes all the possibilities of Unity3D, not marvelous, but pretty enough if used correctly. Yet, what the game aims to be is not beautiful anyway. It aims to be frustrating and enlightening at the same time, and it manages to be both. As a side note, you shouldn't really try this if you have epileptic tendency, because you'll be encountering sharp turns of the

camera, sudden flashes and changes of light quite often. Even I got dizzy and a bit nauseated from time to time. The game has an unconventional loading system btw; each time you'd like to load an episode, you have to type in the name of the episode, so be warned. Attention is your friend sometimes; some other times... you'd better gaze elsewhere because you'd lose time out of curiosity. Achievements are a bit glitchy, so you should verify local cache from time to time to make sure they'd pop up when the requirements are met.

With no subtitles or direct screen commands, you have to listen carefully to understand Vinny, think on it and react as fast as possible. The game keeps both your wits and reflexes sharp. Expect the unexpected. Think outside of the box. Even with the most cliché anecdotes, there is a hidden smart remark, a tongue in cheek mockery with the idea of "common". It is brilliant in a way, and peculiarly annoying and meaningless. Even for that paradox only, I'd recommend the experience.

Considering it is a free game, there is nothing you'd lose for taking a glance. For me, even writing this review has been a challenge, since the whole idea of the game constrains you from declaring general opinions. Try for yourself. What you'll encounter is nothing you've ever encountered before; that I can promise.

just take my money. Pneuma: Breath of Life is an amazing puzzle and thought provoking game.

This game is a First Person Puzzle Game similar to the likes of Portal, Standpoint and Stanley Parable.

The puzzles are not hard and are very simple once you realise the clues around you, Some take a few attempts and really the only challenging ones are those that take a bit of time to complete.

Pneuma: Breath of Life hints at you a lot around what's actually happening but in a very subtle and provoking way and tone.

With really beautiful and stunning graphics, interesting approach to the puzzle genre Pneuma: Breath of Life is a game that should be experienced.

If I was to be pushed to be negative it would be that the game is a tad too short in length of game.

TL;DR

Interesting Puzzles
Stunning graphics
VR support
Lengthy "secret puzzles"

Conclusion

Pneuma: Breath of Life is a great addition to the First Person Puzzle Genre and should be played if you are looking for something interesting, even if it's a tad short :)

If you liked this review or want to see more recommended games, be sure to follow my curator group: [Follow Noaksey's Curator Group](#). Too much expensive for what we have. It took me 30 minutes to beat the game. Punching is slow so you have to get the AI to beat the ♥♥♥♥♥ out of each other. The only thing I like in this game besides the stupidity is the graphics. They look amazing. Anyways, don't buy this game, even for \$0.49 (that's how much I spent. I'm probably gonna get a refund). It's pretty quick to play through. I have not played the new game + yet, but I thoroughly enjoyed the story and almost cried a couple times.

The game controls are a little weird at first. It took me awhile to realize I could face forwards and backwards.

New ghosts would bring new things into the house and I enjoyed exploring the house over and over to discover new things. Very

fun game!. if this game was 2 dollars i'd recommend it. its about 15-20 minutes long. Very interesting gameplay then level up is depended on how much chaos you bring to world. Completing the game without killing an innocent turned into true challenge.

For the price on sale -40% \u00a32.39 I Think its a good deal, you get 3 Stash Maps which in my case got me the PP-2000 in the even level 5 and its O :D, I got 200 Gold, Which you can buy anything with, and the most OP Thing I think is the 7 Day Premium, Got me from level 22 to 35 in a couple of days :) The SKS its self is ok, its not the best gun in the game but for the price its ok, I wil on recommend this pack if on sale.

<https://www.youtube.com/watch?v=ZxbWz4E5mNQ>. For people looking for an extra challenge. This character makes it harder not easier, but she is very fun to play with.. Not worth playing hard to understand what to do. Masterpiece, why can't people appreciate true art? This game is better than any game I have every played by far. not only are the visuals breathtaking and beautiful in their own way, but the Artifical Intelligence is extremely well designed. I am giving this game a solid IGN 9.712356/10.000000. It's a very different game than the other games, didn't played it much, but I think it's really an awesome game that worth a try!. also it's a great game to kill time, and playing with your friends but only in one device. I wish they add multiplayer to play with other players around the world!!.. Awesome maps. The game type is fun, but honestly I'd buy it just for the maps. this\u2665\u2665\u2665\u2665\u2665\u2665sucks! It wont let me play it after i bought it. \u2665\u2665\u2665\u2665\u2665
. No matter how well you do at the beginning of a race, the competition will catch up and make it frustrating. Deus ex Machina to the max - don't bother.
